Five Steps to Risk Assessment
Quality, An Issue of Critical Nursing Clinics of North America, This book covers a wealth of knowledge from experts and informed stakeholders on the best ways to understand, prevent, and control fall-related risk exposures. Featured are subjects on: (1) a public health view of fall problems and strategic goals; (2) the sciences behind human falls and injury risk; (3) research on slips, trips and falls; (4) practical applications of prevention and protection tools and methods in industrial sectors and home/communities; (5) fall incident investigation and reconstruction; and (6) knowledge gaps, emerging issues, and recommendations for fall protection research and fall mitigation.

Gerontologic Nursing - E-Book Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities and assessments, a full suite of instructor resources, and learning analytics reporting tools. Nursing Research: Reading, Using, and Creating Evidence, Fourth Edition is an essential text for nursing students to build the skills necessary for translating research into evidence. The Fourth Edition focuses on the Nursing Practice Guidelines and emphasizes evidence-based practice in the profession of nursing. To reinforce these concepts the author cites a particular article that is appraised throughout the entire text. The Fourth Edition also focuses on the dissemination of information and research best practices as conferences and other such resources become more available to students and professionals. Key Features • Emphasis on Nursing Practice Guidelines • New evaluation tool for reviewing a research article • Extensive PICO questions throughout the text • Addition of the contemporary PECO question • Poster template added to the chapter on translation

Sensory Modulation in Dementia Care
New Developments in Physical Education and Sport

Fundamentals of Nursing E-Book Combining the science of emotional trauma with concrete psychological techniques—including dream interpretation, journaling, mindfulness exercises, and meditation—Shulman's frank and empathetic account will help readers regain their emotional balance by navigating the passage from profound sorrow to healing and growth.

Nurse's Pocket Guide

Johns Hopkins Nursing Professional Practice Model: Strategies to Advance Nursing Excellence
With its new condensed format, completely reorganized and updated content, respected author team, and new lower price, Perry and Potter's Nursing Interventions and Clinical Skills, 5th Edition is your all-around best choice for learning the skills and techniques you'll use every day in practice. Covering 181 skills, this highly accessible manual conveniently groups all related skills together, so you can find information quickly. The companion Evolve website features 50 video clips, skills checklists, and much more, ensuring your successful mastery of each skill. Contains 180 skills and techniques (basic, intermediate, and advanced) you'll use every day in practice. Presents every skill in a logical, consistent format: Assessment, Planning, Implementation, Evaluation -- improving the quality of patient care. Pairs each step with an appropriate rationale, helping you understand and remember why specific techniques are used. Features Safety Alerts that highlight unusual risks inherent in the next step of the skill, helping you plan ahead at each step of nursing care. Uses a Glove icon as a reminder to don clean gloves before proceeding to the next step of the skill, improving patient safety. Guides you in Delegation and Collaboration, explaining when to delegate a skill to assistive personnel, and indicating what key information must be shared. Highlights
Special Considerations such as information unique to pediatric or geriatric patients, to raise awareness of additional risks you may face when caring for a diverse patient population. Provides sample documentation of nurses notes so that you can learn to communicate effectively to the patient care team. Contains multimedia resources such as video clips, skills performance checklists, interactive exercises, and more, all easily available to you on the companion Evolve website at no additional cost. Content has been reorganized to make topics easier to find, improving ease of use. Covers new topics that will help you develop the skills needed to practice according to the TJC and ACCN recommendations. Covers new skills that will prepare you for nursing practice in a wide variety of environments. Features a unique new chapter, Using Evidence in Practice, that introduces you to using evidence to solve clinical problems. Introduces you to Consistent Patient Identification Protocol as recommended by The Joint Commission, improving quality of care and patient safety. Includes enhanced and greatly expanded end-of-chapter exercises, now featuring case study questions, NCLEX alternate format questions, and multiple-choice questions.

Taylor's Clinical Nursing Skills

FALLS IN THE ELDERLY As our global demographic shifts towards an increasingly aging population, we have an opportunity to transform how we experience and think about getting older and embrace the diversity and contribution that this population can bring to society. The International Handbook of Positive Aging showcases the latest research and theory into aging, examining the various challenges faced by older adults and the ways in which we can bring a much-needed positive focus towards dealing with these. The handbook brings together disparate research from medical, academic, economic and social community fields, with contributions from NHS partners, service users, universities across the United Kingdom and collaborations with
international research leaders in the field of aging. Divided into sections, the first part of the book focuses on introducing the concept of positive aging before going on to cover the body over the life course, well-being and care delivery. All contributors recognise the fact that we are living longer, which is providing us with a tremendous opportunity to enjoy and flourish in healthy and fulfilling later lives, and this focus on the importance of patient empowerment is integral to the book. This is a valuable reference source for those working in developmental psychology, clinical psychology, mental health, health sciences, medicine, neuropsychological rehabilitation, sociology, anthropology, social policy and social work. It will help encourage researchers, professionals and policymakers to make the most of opportunities and innovations to promote a person’s sense of independence, dignity, well-being, good health and participation in society as they get older.

Family Nurse Practitioner Certification Prep Plus "The Wit of a Duck and Other Papers" by John Burroughs. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Ghostly Phenomena This quick-reference tool has what you need to select the appropriate diagnosis to plan your patients’ care effectively. The 14th Edition features all the latest nursing diagnoses and updated interventions.

Falls Prevention, An Issue of Clinics in Geriatric Medicine This book is intended for the practicing
surgeon. It is designed to offer practical insights into the essentials of an epidemiological, statistical and outcomes-based approach to surgical practice. Surgeons are invited to begin to develop the requisite skills that will allow them to communicate effectively with their colleagues in epidemiology and

Southern Quakers and Slavery Compassionately care for the aging population with Gerontologic Nursing, 6th Edition, uniquely known for its comprehensive coverage of the most common medical-surgical problems associated with older adults. Organized by body system for easy retrieval of information, it delves into health promotion and both basic and complex gerontologic concepts and issues. This disorder-focused gerontologic nursing text features an enhanced focus on nursing management and care coordination across health care delivery settings. It emphasizes topics such as nutrition, chronic illness, emergency treatment, patient teaching, home care, and end-of-life care — and includes the latest guidelines for mammograms, colonoscopies, pneumonia, and shingles vaccinations. With the addition of new nursing theories, this edition offers a valuable framework for gerontologic care. Overview of age-related changes in structure and function included in all body system chapters. The most current standards and guidelines keep you in the know. Psychologic and sociocultural issues and aspects of older adult care integrated throughout the text. Critical thinking questions included at end of chapters. UNIQUE! Patient/Family Teaching boxes emphasize key aspects of practice and teaching for self-care. Health Promotion/Illness Prevention boxes provide tips to promote leading a healthy life. UNIQUE! Nutritional Consideration boxes demonstrate special nutritional needs and concerns facing the aging population. Evidence-Based Practice boxes pull the critical evidence-based information contained in the text into boxes for easy access and identification. Cultural Awareness boxes highlight differences in how key concepts are understood or practiced in various cultures. Home Care boxes highlight tips to promote practical, effective
home care for the older adult. Key Points at end of chapters summarize the important concepts discussed in the chapter. EXPANDED! Increased focus on nursing management and care coordination across health care delivery settings. NEW! New nursing theories in chapter 2 provide a framework for gerontologic care. UPDATED! Up-to-date guidelines for mammograms, colonoscopies, pneumonia, and shingles vaccinations. UPDATED! Fall prevention updates help you better protect your patients. UPDATED! Updates on the challenges of caring for older adults with cognitive disorders ensure you are prepared. UPDATED! Updated chapters throughout reflect the current evidence to guide practice.

The Immortal Life of Henrietta Lacks The WHO Falls Prevention for Active Ageing model provides an action plan for making progress in reducing the prevalence of falls in the older adult population. By building on the three pillars of falls prevention, the model proposes specific strategies for: 1. Building awareness of the importance of falls prevention and treatment; 2. Improving the assessment of individual, environmental, and societal factors that increase the likelihood of falls; and 3. For facilitating the design and implementation of culturally appropriate, evidence-based interventions that will significantly reduce the number of falls among older persons. The model provides strategies and solutions that will require the engagement of multiple sectors of society. It is dependent on and consistent with the vision articulated in the WHO Active Ageing Policy Framework. Although not all of the awareness, assessment, and intervention strategies identified in the model apply equally well in all regions of the world, there are significant evidence-based strategies that can be effectively implemented in all regions and cultures. The degree to which progress will be made depends on to the success in integrating falls prevention strategies into the overall health and social care agendas globally. In order to do this effectively, it is necessary to identify and implement culturally appropriate, evidence-based policies and procedures. This
requires multi-sectoral, collaborations, strong commitment to public and professional education, interaction based on evidence drawn from a variety of traditional, complementary, and alternative sources. Although the understanding of the evidence-base is growing, there is much that is not yet understood. Thus, there is an urgent need for continued research in all areas of falls prevention and treatment in order to better understand the scope of the problem worldwide. In particular, more evidence of the cost-effectiveness of interconnections is needed to develop strategies that are most likely to be effective in specific setting and population sub-groups.

Polypharmacy, An Issue of Clinics in Geriatric Medicine, E-Book Understand and assess the sensory needs of people with dementia, and learn how to implement sensory modulation-based approaches for enriched care. Drawing on the author's Sensory Modulation Program, this approach aids with self-organization and meaningful participation in life activities. Explaining sensory-processing issues specific to older populations, this book provides a downloadable assessment tool to help review individual sensory-processing patterns. It includes a range of sensory-based activities which can be carried out with people at all stages of dementia, both with individuals and in groups. The book also provides recommendations for modifying physical environments to make care settings sensory-enriched.

WHO Global Report on Falls Prevention in Older Age Yoost and Crawford’s Fundamentals of Nursing is back for a second-edition encore! The text that made its name by focusing on simple language and active learning continues its focus on helping you truly understand, apply, and retain important nursing information and concepts. Using a warm and conversational style, this new second edition guides you towards a basic understanding of the nursing profession and then logically progresses through the nursing process and into the safe and systematic methods of
applying care. Each chapter features realistic and complex case studies and critical thinking exercises woven throughout the content to help you continually apply what you've learned to actual patient care. A conceptual care mapping approach — created by Yoost and Crawford themselves — further your ability to make clinical judgments and synthesize knowledge as you develop plans of care after analyzing and clustering related patient assessment data. All of this paired with a wealth of student-friendly learning features and clinically-focused content offers up a fundamentally different — and effective — way for you to easily master the fundamentals of nursing. UNIQUE! Warm, friendly writing style slows down the pace of information to give readers time to critically think and master all fundamental concepts and skills. UNIQUE! Building block approach groups topics and concepts together thematically, in the order needed for readers to build their knowledge. UNIQUE! Objective-driven approach presents clearly defined, numbered objectives that coordinate with all content and then wrap up with Objective Summaries. UNIQUE! Active learning activities are incorporated throughout every chapter to help readers learn to apply chapter content to broader nursing concepts and realistic patient scenarios. UNIQUE! Conceptual care mapping is taught and used throughout the text in conjunction with the Conceptual Care Map Creator. UNIQUE! Emphasis on QSEN reinforces the Quality and Safety Education for Nurses competencies, including: patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics. Special feature boxes cover the areas of: diversity consideration, evidence-based practice, informatics, patient education, healthy literacy, health assessment questions, interprofessional collaboration and delegation, ethical and legal practice, home care considerations, safe practice alerts, QSEN, critical thinking exercises, and nursing care guidelines. NEW! Interprofessional collaboration and delegation content appears throughout the text along with new IPE activities that are integrated into the Evolve resources. NEW & UNIQUE! Review and exam questions tied to learning objectives use a building-block style
approach that starts at lower Bloom’s taxonomy levels in early chapters and builds to more complex levels as readers acquire more knowledge. NEW! Emphasis on assignment and delegation covers the differences between them and how and when they're appropriate for an RN. NEW! Content on complementary therapies has been integrated throughout the text to reflect the changes to the NCLEX exam. NEW! Additional information has been added in the areas of HCAHPS, Health Literacy, Patient Education, Drugs of Abuse, Zika, Ebola, and more.

Prevention Practice in Primary Care This issue of Clinics in Geriatric Medicine, Guest Edited by Dr. Steven Castle, is devoted to Falls Prevention. Articles in this important issue include: Key components of exercise programs in community to prevent falls; Potential reasons deaths from falls in older adults have doubled in the past decade; Link between Primary care and community-based balance exercise programs; Role of foot orthoses and shoe insoles at improving mobility and balance; Blood Pressure control and falls risk; Optimizing function and physical activity in hospitalized older adults to prevent functional decline and falls; Delirium as it relates to falls; Virtual sitters; Redesigning a Fall Prevention Program in Acute Care: Building on Evidence; and Nursing Unit Design and Hospital Falls.

Washington Manual of Patient Safety and Quality Improvement Discusses the way leaders deal with risk in making foreign policy decisions
Johns Hopkins Nursing Evidence-based Practice Falls among the elderly are common and result in personal injury, mortality, and increased healthcare costs. Employing the Elderly Falls Screening Test (EFST), Timed Up and Go (TUG) and Tinetti Scale, a multidisciplinary team at Johns Hopkins Hospital conducted an assessment of 104 neurology patients to identify fall risk factors within the ambulatory care setting. Results indicated a single question within the EFST, "Have you fallen or nearly fallen in the last year?" most accurately identified the majority of patients at high risk. Recommended was to formalize the asking of this question during patient appointing so that individualized fall prevention measures could be implemented effectively. Environmental hazards were also identified during the assessment and included potential threats to patient safety within the waiting area, hallways, bathrooms, and examination rooms. The result was a system-wide process to reduce or eliminate associated risks.

Risk-Taking in International Politics This issue contains a series of articles focused on various initiatives aimed at improving the quality of patient care delivery and promoting safe passage across the continuum of care. Exemplary, evidence-based nursing practice is the cornerstone of quality care, and this issue highlights many ways in which nurses have led changes to optimize patient outcomes. In addition, quality care enhances cost-effectiveness by reducing avoidable complications and diminishing avoidable hospital readmissions, a concept more important than ever due to value-based purchasing and the Affordable Care Act. Articles are specifically devoted to prevention of delirium in critical care patients, palliative care in the intensive care unit, prevention of pressure ulcers, fall prevention in high-risk patients, prevention readmissions, preventing sepsis mortality, and nursing interventions in the elderly critical care patient, to name a few.
“The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly

Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially
Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.

Diagnosis and Treatment of Vestibular Disorders Concise, portable, and user-friendly, The Washington Manual® of Patient Safety and Quality Improvement covers essential information in every area of this complex field. With a focus on improving systems and processes, preventing errors, and promoting transparency, this practical reference provides an overview of PS/QI fundamentals, as well as insight into how these principles apply to a variety of clinical settings. Part of the popular Washington Manual® series, this unique volume provides the knowledge and skills necessary for an effective, proactive approach to patient safety and quality improvement.

Baptist History: from the Foundation of the Christian Church to the Close of the Eighteenth Century Offers guidance for employers and self-employed people in assessing risks in the workplace. This book is suitable for firms in the commercial, service and light industrial sectors.

Neurology Falls. Patient Falls Risk Assessment, Neurology Clinic, Johns Hopkins Hospital, Baltimore, MD. Continuous professional development is of great importance if one is to develop quality professional work. This book contains some of the latest research advances related to the field of Physical Education and Sports. In today's globalized world, continuous and permanent education is necessary and essential to complement the initial training and previous experience. In this book, you can find a wide range of works focused on innovative teaching methodologies and
psychological variables to take into account to improve classes and training. These studies on the most forward-looking technological advances in physical activity and sports are useful for those who seek to be up-to-date on this type of research. In addition, these studies will be useful to consult regarding current lifestyle, the creation of healthy habits, the promotion of physical activity in one’s free time, and the importance of leading an active life.

Before and After Loss The purpose of this paper is to propose a change with regards to fall risk prevention at the hospital system where the writer works. When a fall prevention program was initiated that encompassed the use of an assessment tool to rate the fall risk level that was used uniformly for all patients the number of falls dropped by 70% according to the previous year (Lara-Medrano, Alcalá-Quinones, Galarza-Delgado, and Baena-Trejo, 2014). The facility currently uses the concept of Every patient is a fall risk which isn't effective due to the fact that the statistics show they are above average for falls. The plan being presented discusses the use of the Johns Hopkins Fall Risk Assessment Tool along with additional interventions in order to categorize patients as; low, moderate or high fall risk and then assign the appropriate interventions to the level of fall risk. To implement the plan it will be shared using a PowerPoint with the caregivers during staff meetings so they are familiar with the changes. House supervisors and charge nurses will be super users and available each shift to help if any questions or issues arise. Finally the results will be disseminated back to everyone involved via reports shared at leadership meetings and managers will take it to their staff.

Assessing Dangerousness Amid the ongoing changes in how health care is administered and financed, prevention-oriented care is a critical and cost-effective method for improving population health through primary care. As the key figure in promoting patients' health and prevention of
disease, the primary care provider can play a major role in patient engagement, self-management, and behavior change. Prevention Practice in Primary Care systematically explores state-of-the-art practical approaches to effective prevention in primary care. Guided by theory and evidence, the book reviews approaches to risk factor identification and modification for the major causes of mortality in adulthood, including cancer, stroke, and cardiovascular disease. Topical coverage in this book includes: · the practical applications of genomics and proteomics to personalizing prevention · transformative approaches to practice change, including the patient-centered medical home, academic detailing, and practice facilitation · Engaging self-management and behavior change using counseling tools (goal setting, assessing the stage of change, motivational interviewing, and the five A's) Prevention Practice in Primary Care is a vital, practical guidebook for the implementation of evidence-based prevention to improve patient health. Brief, simple summaries and innovative content make it book a valuable reference for busy practitioners and students alike.

Preventing Patient Falls This issue of Clinics in Geriatric Medicine, guest edited by Mary Ann Zagaria, PharmD, is devoted to Polypharmacy. Articles in this outstanding issue include: Centers for Medicare and Medicaid Services Support for Medication Therapy Management (Enhanced Medication Therapy Management): Testing Strategies for Improving Medication Use Among Beneficiaries Enrolled in Medicare Part D; The Role of Patient Preferences in Deprescribing; Polypharmacy Reduction Strategies: Tips on Incorporating American Geriatrics Society Beers and Screening Tool of Older People’s Prescriptions Criteria; Polypharmacy and Delirium in Critically Ill Older Adults: Recognition and Prevention; Geriatric Polypharmacy: Pharmacist as Key Facilitator in Assessing for Falls Risk; Medication Reconciliation in Long-Term Care and Assisted Living Facilities: Opportunity for Pharmacists to Minimize Risks Associated with Transitions of Care; Can
Managed Care Manage Polypharmacy?; Medication Risk Mitigation: Coordinating and Collaborating with Health Care Systems, Universities, and Researchers to Facilitate the Design and Execution of Practice-Based Research; and Geriatric Polypharmacy: Two Physicians’ Personal Perspectives.

Surgical Arithmetic A healthy building does more than conserve resources: it improves the health and productivity of the people inside. Joseph Allen and John Macomber look at everything from the air we breathe to the water we drink to how light, sound, and materials impact our performance and wellbeing and drive business profit.

The Wit of a Duck and Other Papers Publisher’s Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Taylor’s Clinical Nursing Skills: A Nursing Process Approach Fifth Edition Pamela Lynn, EdD, MSN, RN Confidently meet the challenges of person-centered nursing practice! From basic nursing processes to advanced clinical capabilities, Taylor’s Clinical Nursing Skills: A Nursing Process Approach helps you hone your cognitive, technical, interpersonal, and ethical/legal capabilities and master patient interaction, clinical reasoning, and communication skills essential to safe and effective person-centered care. Step-by-step, evidence-based guidelines walk you through common practices and simplify complex procedures, accompanied by key considerations for documentation, delegation, and other tasks you’ll encounter throughout the nursing process, from your first day on the job to every stage of your nursing career. Step-by-Step Skills are presented in a concise, straightforward, and simplified two-column format facilitating competent performance of nursing skills. Scientific Rationales accompany each nursing action to promote a deeper understanding of the basic principles supporting nursing care. Unexpected
Situations highlight abnormal outcomes while providing explanations of how to react to provide the best care. Evidence for Practice boxes present current best practice guidelines and up-to-date research relevant to the skills. A Nursing Process Framework integrates related nursing responsibilities for each of the five steps. Skill Variations provide clear, start-to-finish instructions for variations in equipment or technique. Documentation Guidelines guide you through accurate documentation of skills and findings. Hand Hygiene icons alert you to this crucial step that prevents the spread of microorganisms. Patient Identification icons help you ensure the right patient receives the intervention and prevent errors. Delegation Considerations assist you in developing the critical decision-making skills needed to transfer responsibility for the performance of an activity to another individual.

Healthy Buildings This text reviews the current understanding of vestibular anatomy allowing for a framework of reference, and how it's applied to vestibular testing, diagnosis and management of dizziness. Vestibular testing is an important tool in the evaluation and management of the patient with dizziness. It aids in establishing a diagnosis and determining the side or site of the lesion. In addition, it guides practitioners in selection of treatment and allows the ability of the patient’s condition to be evaluated over its time course. Common vestibular pathologies such as benign positional vertigo, Meniere’s disease, multisensory imbalance, vestibular neuritis, superior canal dehiscence, and vestibular migraine will be addressed in a concise and understandable manner. The text follows a clear format in which the etiology, pathophysiology, diagnostic features and medical or surgical management of such pathologies are discussed. The book gains increased importance as superior canal dehiscence and vestibular migraine are relatively new hot topics. Lastly, relatively rare entities such as bilateral vestibular hypofunction, pediatric vestibular disorders and central vestibular disorders are discussed. This text serves as a complete reference
for clinicians, students and researchers interested in this common and severe disorder allowing for improved patient care and advancement of knowledge in the field. Chapters are written by acknowledged experts, allowing summary review of the newest and most up-to-date understanding of scientific information. Diagnosis and Treatment of Vestibular Disorders will be an invaluable resource for otolaryngologists, neurologists, otologists and neurotologists, basic science and translational researchers with interests in the vestibular system, fellows and residents in aforementioned fields, and general practitioners with an interest in patients with symptoms of dizziness.

Emergency Department Visits by Persons Aged 65 and Over

Fall Prevention and Protection Kaplan's Family Nurse Practitioner Certification Prep Plus is your step-by-step guide to scoring higher on the FNP exam. We distill the exam blueprint into short, focused lessons to give you efficient, effective prep so you can ace the FNP exam. This edition offers review and practice for both FNP exams—American Academy of Nurse Practitioners (AANP) and American Nurses Credentialing Center (ANCC). Realistic Practice 800+ practice questions—in the book and online 23 end-of-chapter practice question sets 2 mini prep tests online, one for the ANCC test and one for the AANP Detailed rationales for each correct and incorrect answer choice Expert Guidance Exclusive test-taking and study strategies that optimize your preparation We know the test: Kaplan’s experts ensure our practice questions and study materials are true to the exam We invented test prep—Kaplan (www.kaptest.com) has been helping students for 80 years, and our proven strategies have helped legions of students achieve their dreams.

The Barton Experiment "Ghostly Phenomena" by Elliott O'Donnell. Published by Good Press. Good
Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Human Aspects of IT for the Aged Population. Applications in Health, Assistance, and Entertainment This book constitutes the proceedings of the 4th International Conference on Human Aspects of IT for the Aged Population, ITAP 2018, held as part of the 20th International Conference, HCI International 2018, which took place in Las Vegas, Nevada, in July 2018. The total of 1171 papers and 160 posters included in the 30 HCII 2018 proceedings volumes was carefully reviewed and selected from 4346 submissions. ITAP 2018 includes a total of 84 papers. They were organized in topical sections as follows: Part I: aging and technology acceptance; aging and interaction; intergenerational communication and social participation. Part II: health care technologies and services for the elderly; intelligent environments for aging; and games and entertainment for the elderly.

The Van: A Tale of Terror Do you have a work culture that fosters collaboration, stimulates innovation, and empowers nurses to achieve success in exceptional ways? In Johns Hopkins Nursing Professional Practice Model: Strategies to Advance Nursing Excellence, authors Deborah Dang, Judith Rohde, and Jeannette Suflita present a model proven to inspire professional nurses to deliver exceptional care delivery and outcomes. Whether you’re a bedside nurse or an executive, you’ll learn how to adapt the Johns Hopkins Nursing Professional Practice Model to your work setting. Packed with exemplars, self-assessment guides, planning tools, and lessons learned, this
manual guides you in creating and sustaining an environment where professional nursing practices flourish. Learn practical strategies to: Empower front-line nurses and encourage interprofessional collaboration Build and implement programs that promote adaptation, ownership, and accountability Establish practice and leadership standards Structure organizations to foster leadership and advance nursing excellence With a focus on achievement, caring, empowerment, and influence, Johns Hopkins Nursing Professional Practice Model can help reshape the future of nursing.

International Handbook of Positive Aging Providing a big-picture approach to nursing practice, Fundamentals of Nursing: Concepts and Competencies for Practice, 9th Edition instills the foundational knowledge and clinical skills to help your students think critically and achieve positive outcomes throughout the nursing curriculum and in today’s fast-paced clinical settings. This revision immerses students in a proven nursing framework that clarifies key capabilities — from promoting health, to differentiating between normal function and dysfunction, to the use of scientific rationales and the approved nursing process — and includes new Unfolding Patient Stories and Critical Thinking Using QSEN Competencies. NCLEX®-style review questions online and within the book further equip students for the challenges ahead.

Capstone Project Research and clinical expertise are brought together in this practical volume to examine whether the following violence can be predicted: battered women being killed by their partners; battered women killing their partners; children being physically and/or sexually abused; and sexual offenders and batterers re-offending. Following an introduction to theoretical and clinical issues involved in the prediction of violence, the contributors present research and theory in language that is accessible to clinicians. They discuss accurate measurement using tested
instruments, the role of clinical observations, and health and judicial implications.

Nursing Interventions & Clinical Skills - E-Book Preventing Patient Falls presents the authoritative Morse Fall Scale for predicting the likelihood of a patient falling. The book is the culmination of the author's eight years of research into patient falls and what can be done to prevent them. Full guidance is given on implementing the Morse Fall Scale within a comprehensive fall prevention programme. An extensive range of direct practice issues is tackled.

Five Steps to Risk Assessment Injury following falls is one of the major problems in the health care of the elderly. Falls have many causes: disturbance of balance, poor sight, inappropriate mobility aids, confusion. The morbidity, frequently complicated by fractured bones weakened by osteoporosis, can be very severe indeed, often life-threatening.
